Message box: Preventive health care keeps women healthy. Requiring insurers to cover preventive health care like birth control, breastfeeding support, and screening for domestic violence and HIV makes these services accessible for more women. And it helps women stay healthy.

Conservatives in Congress try in any way to limit women's access to birth control, which is their motive in trying to limit this coverage. Employers should not be able to deny women health prevention coverage.

Please remove the proposed religious employer refusal provision from your Women's Preventive Services rule. I work for a Catholic hospital, and the provision would prevent me from getting birth control (if I chose to participate in their el cheapo coverage).
